

T-Mobile G2x with Google

The latest 4G smartphone to join T-Mobile's exclusive line of G-series devices and T-Mobile's first smartphone with a powerful dual-core processor, the T-Mobile G2x with Google is made for speed and mobile entertainment with built-in support for America's Largest 4G Network, brilliant 4-inch capacitive touch screen display, preloaded video games such as Need For Speed SHIFT HD and N.O.V.A. demo.

Manufactured by LG and powered by Android™ 2.2, the T-Mobile G2x offers 4G speeds, premium mobile entertainment and a pure Android operating system.

Customers can enjoy their favorite movies and TV shows virtually anytime, anywhere through T-Mobile TV with access to live and on-demand programming. The G2x also comes equipped with an 8-megapixel camera with LED flash and autofocus and a 1080p high-definition (HD) video recorder for capturing and sharing moments. DLNA capability and HDMI mirroring enable G2x customers to stream full HD movies, videos and games directly from their phone to their TV or share content with their PC.

Featuring a sleek and stylish design, the G2x includes a 1.3-megapixel front-facing camera for T-Mobile Video Chat powered by Qik, support for Wi-Fi and 8GB of internal memory.
